Case Study: Danish Bakery Ltd

Month:	June
Topic:	Air-conditioning
Case Study Title:	Danish Bakery Ltd

Name of the Climate or Social Enterprise or Activist Group:	Danish Bakery Ltd
What is their Story?	Danish Bakery Limited is investing in a more efficient and sustainable air conditioning system, after benefitting from Malta Enterprise's Smart and Sustainable Investment Grant Scheme. This system, known as adiabatic, makes use of water to cool air. This is an example of the benefits of government investment and innovation working together

	to benefit the climate.
Link to the Case Study:	https://whoswho.mt/en/danish-bakery-invests-in-new-air-conditioning-system-that-uses-water-to-cool-air https://covid19.maltaenterprise.com/smart-and-sustainable-investment-scheme-2021/
Why is this a Good Example to Follow?	This scheme is a good example to follow because it reduces the amount of energy wasted in Malta. This will increase the sustainability of the Maltese economy and help it reach its target of carbon neutrality by 2050. This is also one of the first examples of the smart and sustainable investment scheme at work and it's very promising to see proactive engagement from the government to help businesses in their transition towards a sustainable economy.
What Impact has this case study example achieved?	It's difficult to measure the impact that this case study has had so far as the smart and sustainable investment scheme only began last year. However air-conditioning is a huge user of energy in Malta and as the climate begins to heat up this will only intensify. Any efforts that are made to make air-conditioning more efficient and sustainable should be welcomed.
