Case Study: Eskola Malta

Month:	September
Topic:	Back to School
Case Study Title:	Promoting Sustainable Mobility Choices

Name of the Climate or Social Enterprise or Activist Group:	Nature Trust Malta
--	---------------------------

What is their Story?	<p>In Malta generally, and especially during the school year traffic is a huge problem that costs people precious time and puts a huge amount of carbon into the atmosphere while cars sit idle. This project aims to reduce this problem by encouraging children to walk or cycle to school and encouraging their parents to let them. This project was established by nature trust Malta in collaboration with transport malta, their mission is to protect the natural environment in Malta. Having been established in 1962 they have done great work to protect natural habitats and wildlife all over malta.</p>

Why is this a Good Example to Follow?	<p>This project is a good example to follow because it addresses a real climate issue with a simple and effective solution. The collaboration between a NGO and a government department is also extremely promising to see as it shows what is possible when civil society and government work together to find solutions to climate issues .</p>
What Impact has this case study example achieved?	<p>This project has managed to impact children and parents all across the country and drive awareness on the importance of sustainable transport. the first annual sustainable mobility awards were hosted this year as some true climate heroes were acknowledged for their efforts. They have also established Bike/Scooter days where all children are encouraged to bike or scoot to school</p>
